The CGBV Project has one driving factor: For all women to live a life free of violence at home, at work and in public spaces.

This International Women's Day, under the theme of "Women in leadership: Achieving an equal future in a COVID-19 world," the project took initiatives to engage with CNG transport authorities, government officials, and factories on preventing sexual harassment in public transports and workplaces, to have conversations around power imbalances within communities, and to celebrate women as symbols of leadership and resilience.
